you add the number 1,2,3, etc. in front of thousand and instead of saying cien you say cientos (which means 100th)

Ejemplo 1: Doscientosmil.....tres **cientos** mil.....cuatro **cientos** mil..... cinco cientos mil...Do you see the pattern?.....continue until you reach 1,000,000 (**Un millón!**)

Ejemplo 2: How do you say 1,985?

Start with the first number (1) it represents 1,000 so you say **mil**

the next number is 9 which represents 900 so you say **novecientos**

the next number is 8 stands for 80 so you say **ochenta**

(and) is Y.....and (5) is cinco...so together you'd say: **mil novecientos ochenta y cinco!**
